EDUCATION

ch

Indian Institute of Information Technology Kottayam <i>B.Tech in Computer Science and Engineering</i> - Specialization in AI and Data Science - Completed 3 Semesters	2023 – Present <i>CGPA: 8.85/10.0</i>
---	--

EXPERIENCE

ch

DenvakLLP <i>App Developer Intern</i> - Developing a mobile application for dentists to streamline patient management - Implementing features for efficient record keeping and appointment management - Technologies: Flutter, Firebase, Digital Authentication, Data Analysis	Dec 2024 – Present <i>Remote</i>
BetaLabs IIITKottayam <i>App Development Sub Lead</i> - Leading a team in developing an event management app for college club events - Managing full-stack development and cloud infrastructure - Technologies: Flutter, Firebase, Cloud Applications, Full-Stack Development	Oct 2024 – Present <i>On-site</i>

TECHNICAL SKILLS

ch

Programming Languages & Frameworks <i>Flutter/Dart, Python, SQL, TypeScript, Next.js, ReactJS</i>	Proficiency
Technologies & Tools <i>Flutter, ReactJS, AngularJS, Tailwind CSS, Next.js, TypeScript</i>	Mobile & Web
Backend & Databases <i>Firebase, Cloud Firestore, MongoDB, PostgreSQL, MySQL, Node.js, ExpressJS</i>	Development
Development Tools <i>Git, GitHub, Vercel, Cursor, Figma</i>	Tools
AI & Machine Learning <i>Convolutional Neural Networks (CNN), ResNet, Gemini API, Python</i>	Technologies

PROJECTS

ch

Dental Management App - Mobile application for dentists to manage patient records and appointments efficiently - Implemented authentication and data analysis features	Flutter, Firebase, Cloud Firestore
College Event Management App Live Demo - Developed an app to manage all club events at IIIT Kottayam - Integrated Google Calendar API for event scheduling	Flutter, Firebase, OAuth
Gemini Chat Bot GitHub - Created a Discord bot utilizing AI capabilities through the Gemini API - Implemented intelligent response generation and user interaction features	Python, Discord.py, Google GenAI
Facial Recognition System Developed a Flutter application for facial recognition in crowded environments	Flutter, CNN, ResNet

- Implemented deep learning models for accurate face detection and recognition

Study Tracker Bot | [GitHub](#)

Python, Discord.py, Gemini API

- A Discord bot designed to assist users in managing tasks and schedules effectively
- Integrated with Gemini API for enhanced functionality

Codeforces Bot | [GitHub](#)

Python, Discord.py, Web Scraping

- A Discord bot that provides real-time insights and personalized recommendations for competitive programming
- Utilizes Codeforces API for data retrieval

Web Chat | [GitHub](#) | [Live Demo](#)

Firestore, Next.js, TypeScript

- A basic chat application allowing users to join chat rooms anonymously
- Built using Firestore for real-time data synchronization

Ninja Game | [GitHub](#)

Pygame, Game Development

- A 2D open-world game where players control a ninja character
- Developed using Pygame for interactive gameplay

CERTIFICATIONS

ch		
	Flutter & Dart - The Complete Guide [2025 Edition] View Certificate • 30 hours of comprehensive Flutter and Dart development training • Completed January 2025	Udemy
	Develop Discord Bots in Python - Ultimate Course View Certificate • Advanced Discord bot development using Python • Completed December 2024	Udemy
	Python (Basic) Certificate View Certificate • Demonstrated proficiency in Python programming fundamentals • Completed November 2024	HackerRank
