EDUCATION

Bachelor of Technology - Computer Science Engineering
Indian Institute of Information Technology Kottayam
CGPA : 9.1

2024

INTERNSHIP

Intern at Hewlett Packard Enterprise (HPE)

02/2024 – present

Bangalore

Part of the High Performance Computing (HPC) team working on the Adaptive Robot Suite project(automation of test cases using Robot Framework considering firmware, software, driver versions of the IO Card - running python scripts in Jenkins for HPE Compute Scale-up Server 3200 protos).

SKILLS

Languages

Python, C, C++, HTML, CSS, Javascript, Java

Libraries

Tkinter, requests, BeautifulSoup, smtplib, Numpy, Pandas, Matplotlib, Seaborn, scikit-learn, keras, NLTK

Other skills

Knowledge of MySQL, Google Cloud Platform, Big Data Analytics Tools (Pig-Latin, Hive), Git, Linux commands, Bootstrap, jQuery, Node JS, Express, React

PROJECTS

AI for Student Well-being: Harnessing NLP to Predict Depression from Social Media

Detecting depression in students based on social media texts(NLP) from Reddit. Used Logistic Regression, SVM, Naive Bayes, LSTM, BERT and GRU. Hyperparameter tuning and explainability(LIME)

Data Science and Machine learning

More than 20 projects done using libraries like numpy, pandas, matplotlib, seaborn, scikit-learn.

Vaccination website for COVID - 19

This website uses HTML, JavaScript, CSS. It uses frames, forms for vaccination, hyperlinks, tables etc.

Breast Cancer prediction using a perceptron

Developed a breast cancer predicting program using a perceptron in Python. Provided the radius, texture, perimeter and area, a perceptron determines whether the person is positive or not. The system has about 90.625 % efficiency.

Online restaurant using PHP

Created a website for an online restaurant, similar to SWIGGY order services. The data is saved in a connected database using MySQL.

Neural network projects

Python, Tensorflow, keras, sklearn

Projects in deep learning, implementing neural networks. EDA and evaluation is also done for the data.

Web Development Projects

Multiple mini-projects built using HTML, CSS, Bootstrap, JavaScript, jQuery, React

Fun-Projects

Python, OOP, Tkinter, Pandas, BeautifulSoup, smtplib, API requests,HTML, and more
Pomodoro Technique, Spotify playlist Generator, Password manager, Flashcard app

EXTRA CURRICULAR ACTIVITIES

Hackathons

Participated in MSME Idea Hackathon 3.0, CTI Hacks-1 hackathon, and East Coast Hackathon

2023
