Education

Indian Institute Of Information Technology Kottayam

Nov. 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence And Data Science)

Kottayam, Kerala

Technical Skills

Machine Learning, Deep Learning

Languages: Python, Java, C/C++, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Figma, Google Cloud Platform, GitHub, Jupyter Notebook

Technologies: MERN And MEAN (MongoDB, Express.js, React.js, Node.js, Angular.js)

Frameworks: Vue.js, Django, ReactNative, Flutter

Relevant Coursework

- Data Structures
- Database Management
- Algorithms Analysis
- Mastery Of Essential Skills
- Probability and Statistics
- Calculus
- Operating Systems
- Computer Architecture

Projects

Expense Tracker App | *MERN (MongoDB, Express.js, React.js, Node.js) + Apollo GraphQL* **August 2024 - Present**

- Implemented GraphQL API with Apollo Client, reducing data fetching time by 25%. Secured authentication using Passport.js and MongoDB session store, ensuring secure and persistent user sessions.
- Integrated robust error handling mechanisms on both server and client sides, simplified deployment using Render, and implemented cron jobs for automated tasks.
- This comprehensive app provides users with an efficient and secure way to track their expenses, leveraging modern web technologies for optimal performance.

AI SaaS Chat Bot | *MongoDB, Express, React JS, node JS, NLP*

May 2024-July 2024

- Redesigned an AI chat bot to enhance user interaction by efficiently resolving queries and storing session data for 7 days.
- Developed bot features including real-time updates, personalized responses, multi-platform support, and robust security.
- Integrated secure login and data encryption, ensuring the privacy of over 100 user interactions.
- Implemented scalable architecture, accommodating a 30% increase in user demands without performance degradation.

Text Extractor And Translator | *Python, TensorFlow, OCR, NLP, App Development (Android, Web, iOS)*. **Sept 2023 -Present**

- Led a team of 5 members in developing a web application
- Developed cross-platform app for text extraction from images/documents, achieving 95% accuracy in text recognition.
- Integrated OCR, NLP, and language translation features, enabling support for 2+ languages.
- Utilized machine learning models with TensorFlow to improve text extraction accuracy by 15%.
- Streamlined data integration processes, reducing data processing time by 20%..

Solar System | *HTML, CSS, JavaScript*

February 2023

- Created an interactive website explaining the Solar System and Earth, featuring quizzes for user engagement.
- Designed quizzes for each section, enhancing user engagement by 20%.
- Integrated hover-over information feature, providing detailed facts about each planet.

Volunteering

BetaLabs

IIIT Kottayam

Internet of Things and Clouds Club

- Lead
- Sub-Lead

September 2024 - Present
November 2023 - September 2024

Google Developer Student Club (GDSC)

IIIT Kottayam

Member

November 2023 - Present

Certifications

Summit 2023 @IIIT Kottayam

June 2023

Machine Learning and Deep Learning in space

IIIT Kottayam

- Participation Certificate for Oral Presentation about deep learning in Space
