Projects

Hospital Management System — *Flask, SQLAlchemy, MySQL, HTML, CSS, JavaScript*

Sept. 2024 - Nov. 2024

- Developed a comprehensive Hospital Management System using Flask and SQLAlchemy to manage patient records, doctor appointments, and administrative tasks. The system allows for seamless integration of patient details, doctor schedules, and appointment tracking. Features include user authentication, CRUD operations for patient and doctor data, and the ability to manage appointments efficiently.
- Implemented authentication, CRUD operations, and appointment scheduling for efficient hospital workflow.
- **Key Contributions:**
 - * Designed and implemented the patient and doctor models for data storage and management.
 - * Integrated user authentication to secure the system and protect sensitive data.
 - * Implemented appointment scheduling functionality, improving workflow efficiency for doctors and patients.
 - * Developed an intuitive user interface for easy navigation by hospital staff and patients.
